LETTER OF SUMMATION

(Mohawk's docket # W-02341^A-06-0040

And reference to

Tacna's docket # W-01344^A-04-0815)

RECEIVED
2006 MAR 29 P 3:22
AZ CORP COMMISSION
DOCUMENT CONTROL

Mohawk is currently serving customers in most of its requested extension area, having the infrastructure and pipes already in use and having the pipes in ground since 1974 when Mohawk Utility Company first started.

Mohawk's water plant is currently out of its current CC&N, being 1 mile west. If Tacna Water were to secure the area it wants, Mohawk's plant would be right in the middle of their CC&N.

Mohawk is willing to relinquish (from our CC&N Extension application) the area currently owned by Steve Kelland's uncle (north of the water plant). In addition, we would consider relinquishing the area south of the Interstate 8 freeway with the exception of our current 9 customers. The other areas in our application (between our current CC&N area and north of our current CC&N area) the property owners have stated they would like to have Mohawk supply water to their property.

It is not practical to have two water utilities using the same right-of-ways. This would/could be a huge problem (i.e., hitting each others lines or possible cross contamination).

Mohawk needs its share of requested area to insure its growth and future. It is mutually agreed that a water system needs at least 500 hookups just to be viable.

Mohawk's extension is contiguous, showing a growth pattern, not random as Tacna's shows.

Finally, this isn't the first time Mohawk has filed a CC&N Extension application. We filed one a few years ago. When we decided to re-file our application again, we were under the impression you had to have certain permits before filing. We were waiting for the franchise to get approved and then we filed our application.
